

SAIC Infrastructure Optimization

A Trusted Partner to Help You Do More to Meet Your Mission

Maintaining decades-old IT systems is inefficient and costly. It diverts budget and operational resources from truly impactful mission work and slows the adoption of modern technologies that today's users expect.

SAIC is helping civilian and DOD agencies reach new levels of effectiveness by delivering IT environments built on modern infrastructures that are cost-efficient, scalable, and able to integrate new technologies. These modern IT environments empower workforces to maximize their resources and focus on their missions while delivering fast, reliable, and mobile services to the American people. For more than 50 years, SAIC has been modernizing government IT, giving us an advantage in improving your mission and operations at any scale.

A FEDERAL TECHNOLOGY INTEGRATOR WITH THE DEPTH AND BREADTH OF IT MODERNIZATION EXPERIENCE YOU NEED.

Benefits

OPERATIONAL AGILITY

Our IT architecture design proficiency and engineering expertise get you ready to leverage the cloud and use modern ways of delivering services to your people and customers.

RELIABLE SERVICES

Legacy IT environments are a patchwork of systems and labor-intensive when issues arise. Our infrastructure optimization aligns and right-sizes your resources.

MISSION ACCELERATION

Improving service performance and capabilities while reducing the burdens of maintaining legacy IT allows you to focus on what matters most: delivering on your mission.

KEY CUSTOMERS: NASA, USCENTCOM, DOS Vanguard, Army HITS, Sandia National Labs, STRATCOM, GSA, USDA, USMC, AMRDEC, AMCOM ITSS-III, PBGC, FRTIB, EPA, DOT, VITA, State/Local, Commercial

SAIC knows that IT modernization is not about getting the newest or trendiest technology. It is about putting our customers' needs first and using our deep mission understanding to bring the right technologies to bear. We are a trusted partner that delivers future-proof, best-in-class solutions and services, with a history of executing to the specific and unique needs of each government agency.

SAIC's Approach

SAIC uses repeatable, comprehensive processes, techniques, and tools for modernization and migration engagements. Our know-how with agency missions and intimate access to top technology providers help agencies solve the most complex challenges. Our Strategic Alliances with these providers allow us to give you the best-integrated team offering leading technologies, services and innovation.

Cloud Migration Edge™ (CME) is our cornerstone framework used to support modernization strategies for cloud architecture adoption, data center consolidation, and legacy application modernization. CME provides techniques, tools, and templates derived from real-world project experience, coordination with our Strategic Alliances, and evolving industry changes, all of which underpin successful management of cloud migration and continuous improvement. The CME methodology aligns with the Information Technology Infrastructure Library (ITIL) best practice lifecycle and spans technology assessment, design, implementation, and monitoring for improvement efficiencies.

With our track record of success in providing infrastructure solutions, Bloomberg Government recognized us the third leading federal cloud services contractor.
