

SAIC Digital Engineering (DE) Toolkit for Rhapsody

Installation Procedure

05/17/2023

This presentation consists of SAIC general capabilities information that does not contain controlled technical data as defined by the International Traffic in Arms (ITAR) Part 120.10 or Export Administration Regulations (EAR) Part 734.7-11.

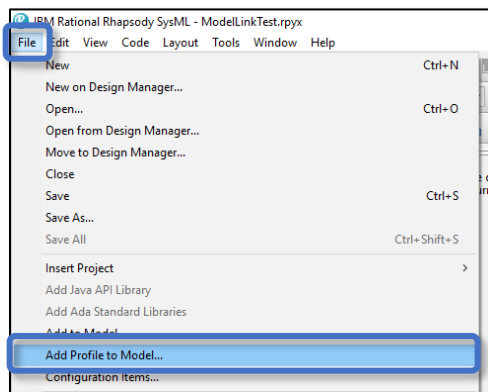

Installation Procedure

1. Download the *SAIC DE Toolkit Installation Files.zip* file from the [SAIC DE website](#).
2. Unzip the file onto your local machine
3. Open Rhapsody
4. Create/Open a Rhapsody SysML project
5. Add the SAIC DE Toolkit Profile to the model (See below for details on adding the profile to the model)

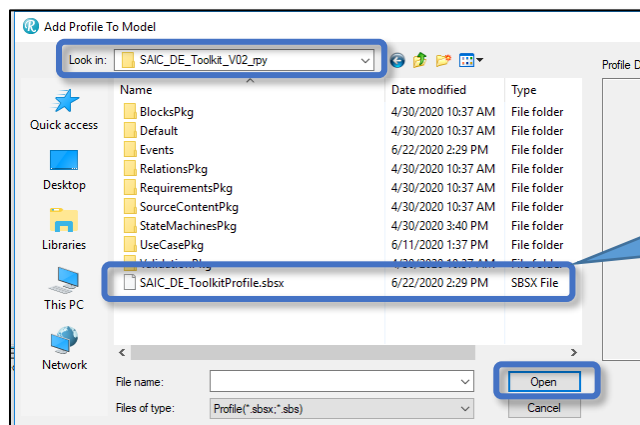

Adding the Profile to the model

Note: The installation files come with a Rhapsody Model (SAIC_DE_Toolkit_V05). We are adding the profile within that model (the SAIC_DE_ToolkitProfile.sbsx file within the *_rpy folder).

1. Click **File->Add Profile to Model**

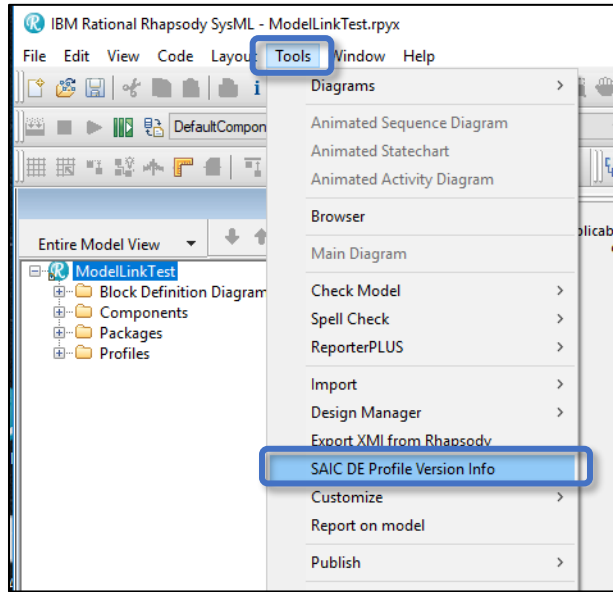

2. **Navigate** to the folder where you saved the contents of the .zip file
3. From there, **navigate** to the SAIC_DE_ToolkitProfile.sbsx file.
(..\Rhapsody SAIC DE Toolkit Installation Files V2_5\SAIC_DE_Toolkit_V05\SAIC_DE_Toolkit_V05_rpy)

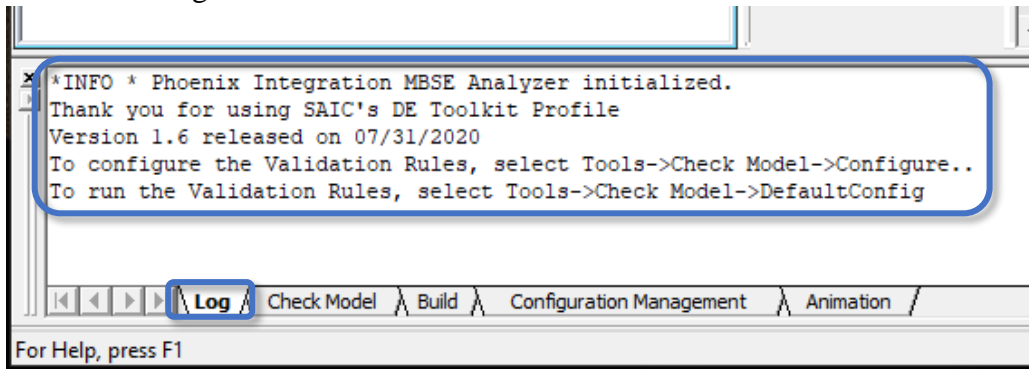

Make sure to choose the .sbsx file, not the .rpyx file in the previous folder!

4. To make sure the profile was added properly, **click** Tools->SAIC DE Profile Version Info

5. Observe the log window for version information
