

Jennifer Lewis

Senior Director, Army Application Modernization
SAIC Defense and Civilian Sector

Jennifer Lewis is Senior Director of Application Modernization in the Army Business Unit. She oversees a \$70M portfolio of U.S. Army services and mission support with a focus on application development, cloud migration and data analytics.

Jennifer joined SAIC in 2004 and has worked as a Chief Simulation and Software Engineer, creating the products and services now used for application modernization using Agile and DevSecOps best practices.

In her career, she worked in application development, software integration and interoperability, data management and analytics, eXtended reality (XR) and live virtual constructive (LVC) simulation environments for the U.S. Army and Air Force.

Jennifer has a Master of Science in Computer Science with an emphasis in Telecommunications and Networking from the University of Texas at Dallas and is a Certified Modeling and Simulation Professional.
